Clinical Research Navigators

The Georgia CTSA Navigator Team **facilitates the flow of clinical research trials from concept to initial approval and implementation** by assisting with maintaining compliance, quality, and innovation activities for each of the research offices at the partner institutions of the Georgia CTSA.

Services Provided

- **Investigator Dashboard** provides a window into the approval process allowing study teams the capability of viewing real-time progress of studies pending approval.
- **Liaison to the Trial Innovation Network (TIN)** offers study investigators of multi-site trials the ability to request an initial consultation or specific resources for trials.
- **Data Safety and Monitoring Board (DSMB)** offers studio consultations and resources that support the investigator with the development of a Data Safety Monitoring Plan and/or Board.
- **Rapid Response Team** streamlines and facilitates the pre-award approval process for high priority NIH and/or other federally funded network studies needing fast-track approvals.
